Each year, Monroe County devotes a large portion of the budget to capital projects. This large financial investment is required to maintain and expand public facilities and infrastructure. If we fail to maintain our capital stock, our facilities and infrastructure will deteriorate until costly maintenance is required and services are cut. Capital plans are developed in concert with the Monroe County Year 2010 Comprehensive Plan.

The *Capital Projects Plan* is designed to maintain existing infrastructure and accommodate future growth. Each capital project is undertaken to acquire capital assets, defined as new or rehabilitated physical assets that are nonrecurring, have useful lives of more than five years, and are expensive to purchase. Examples of capital projects include construction and rehabilitation of public buildings, major street improvements, parks and recreation projects and acquisition of fire trucks.

Monroe County's *Capital Projects Plan* is a multiyear plan that identifies each proposed capital project to be undertaken, the year in which it will be started, and the proposed method of financing the expenditures. This information is presented in summary form, by year, and disaggregated by funding source.

The *Capital Projects Plan* should not be confused with the capital budget. The capital budget represents the first year of the capital projects plan and is legally adopted by the Board of County Commissioners annually each fall. Projects and financing sources listed in the *Capital Projects Plan* beyond the current year are not authorized until the annual budgets for those "out years" are legally adopted.

The basic functions of the Capital Projects Plan are described as follows:

Formal mechanism for decision making. The *Capital Projects Plan* provides Monroe County with an orderly process for planning and budgeting for capital needs. Answers to questions about what to build, when to build, and how much to spend are provided.

Link to long-range planning. The *Capital Projects Plan* is developed in concert with the comprehensive land use plan and other long-range, strategic plans. New demands due to changes in population, employment patterns, demographics and land use plans require changes to the community's planning process.

Financial management tool. Decisions must be made about not only what the community needs, but what it can afford. By providing estimates of revenue sources and possible financing mechanisms, projects can be prioritized to ensure that the best use is made of financially constrained capital dollars.

Reporting document. The *Capital Projects Plan* describes proposed projects and communicates to citizens, businesses, and other interested parties Monroe County's capital priorities and expected sources of funds for the projects.

In summary, the *Capital Projects Plan* is designed to guide Monroe County's capital planning process in order to promote financial stability and limit the need for dramatic tax increases or diversions of resources from other programs to make unanticipated capital expenditures.
